## Introduction

---

# School Outcomes Model

This is the outcomes model for a school developed in DoView Outcomes Software (doview.com) (Version 2.0). An outcomes model sets out all of the lower-level steps needed to achieve higher-level outcomes and can be used for purposes such as: strategic planning, priority setting, monitoring and evaluation.

Install a trial version of DoView ([doview.com/download.html](http://doview.com/download.html)) and then download this model from the link below and start playing with it.

**Creative Commons Copyright:** You are free to use this model for most commercial and non-commercial uses as long as you include the acknowledgment set out on the Acknowledgment page. For further information please see [OutcomesModels.org](http://OutcomesModels.org). For more information on how to work with outcomes models see [OutcomesCentral.org](http://OutcomesCentral.org).

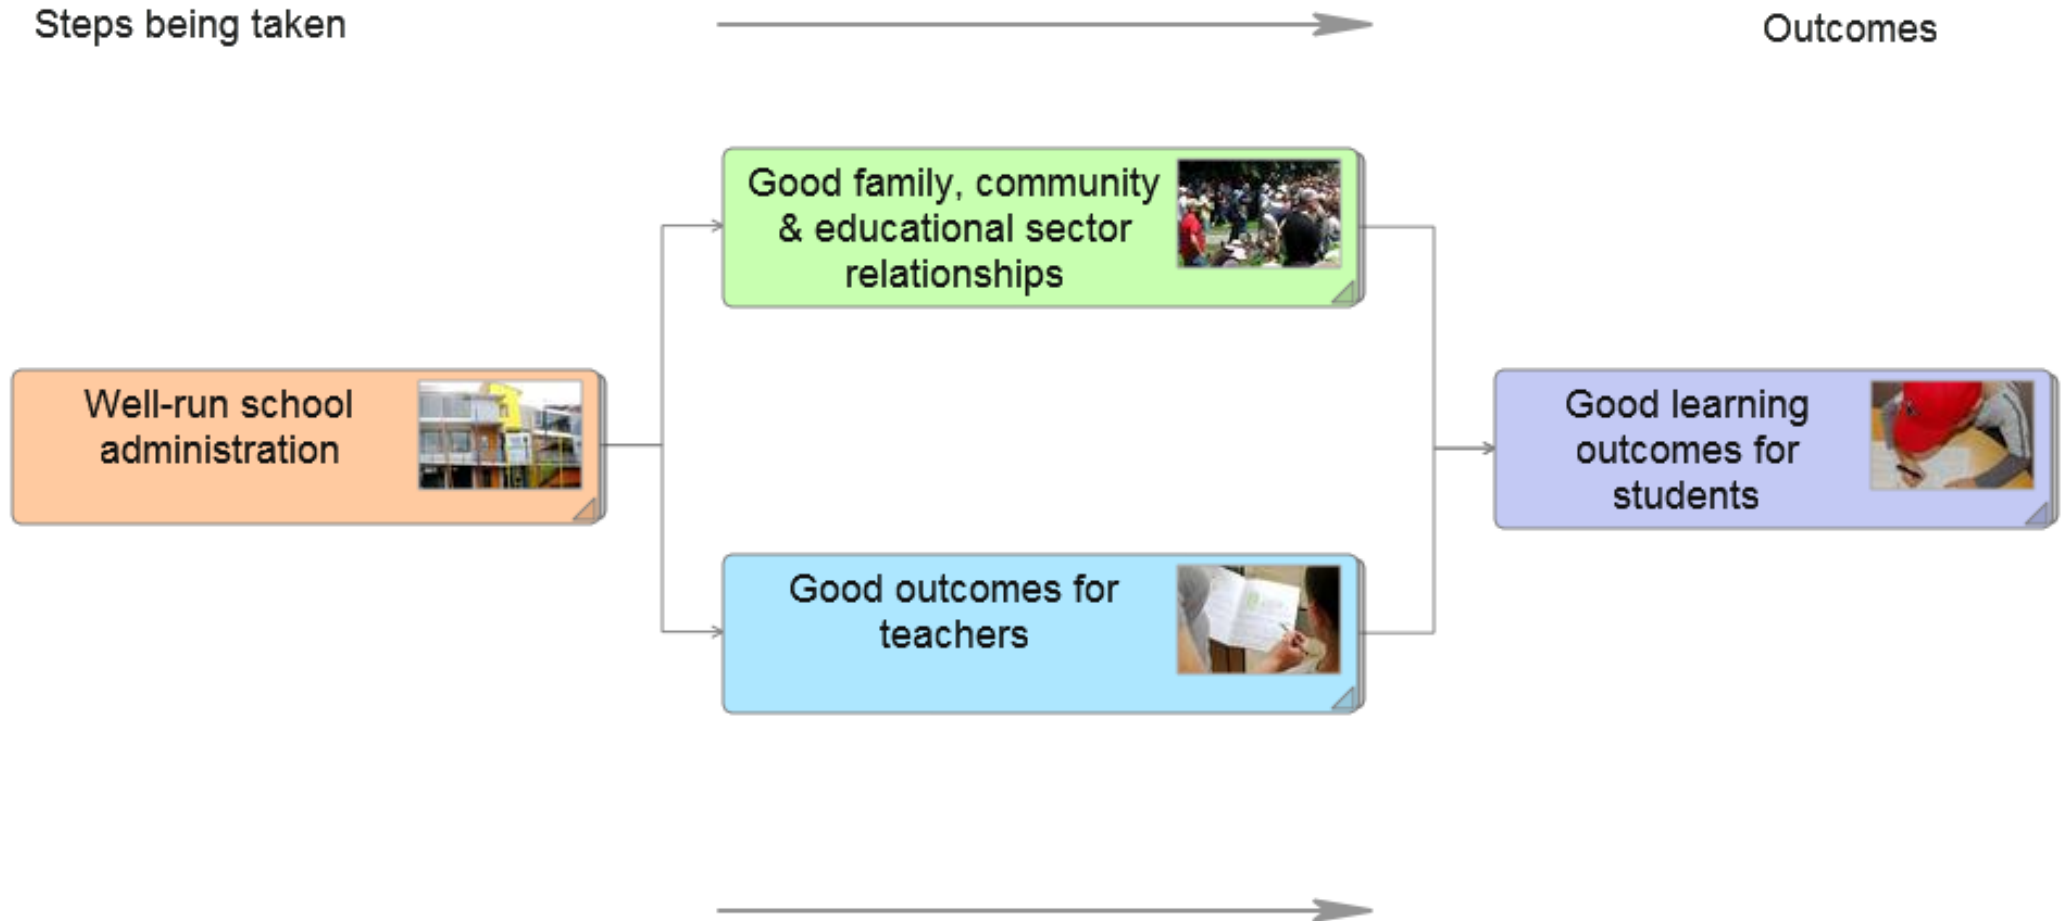

This file can be obtained from: <http://www.outcomesmodels.org/models/school6.html>

## Additional Pages Illustrating More Possibilities

---

These other pages in this model illustrate some of the additional ways a DoView model can be used. The compact model (made up of standard small 1 x1 pages has been 'cloned' onto a poster size page (3 x 3).

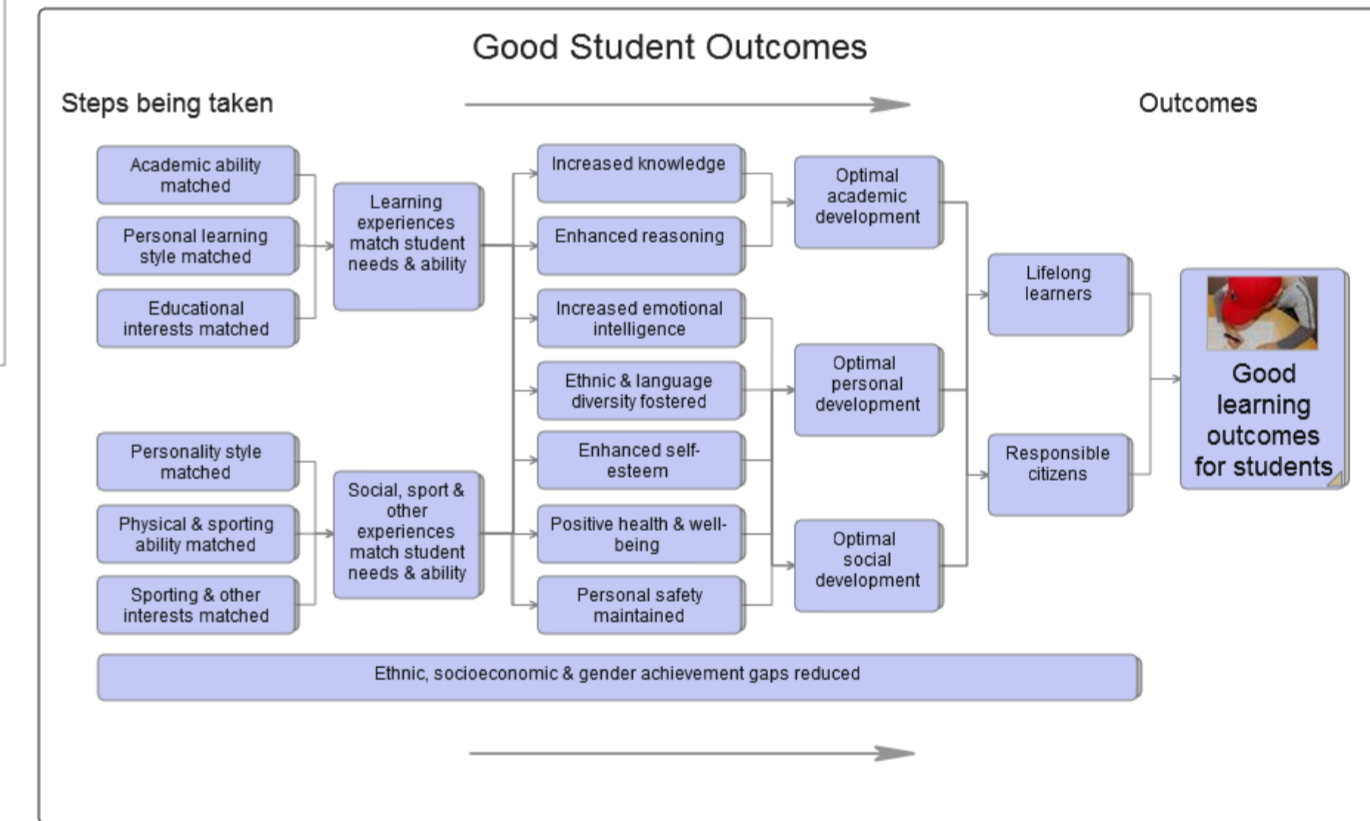

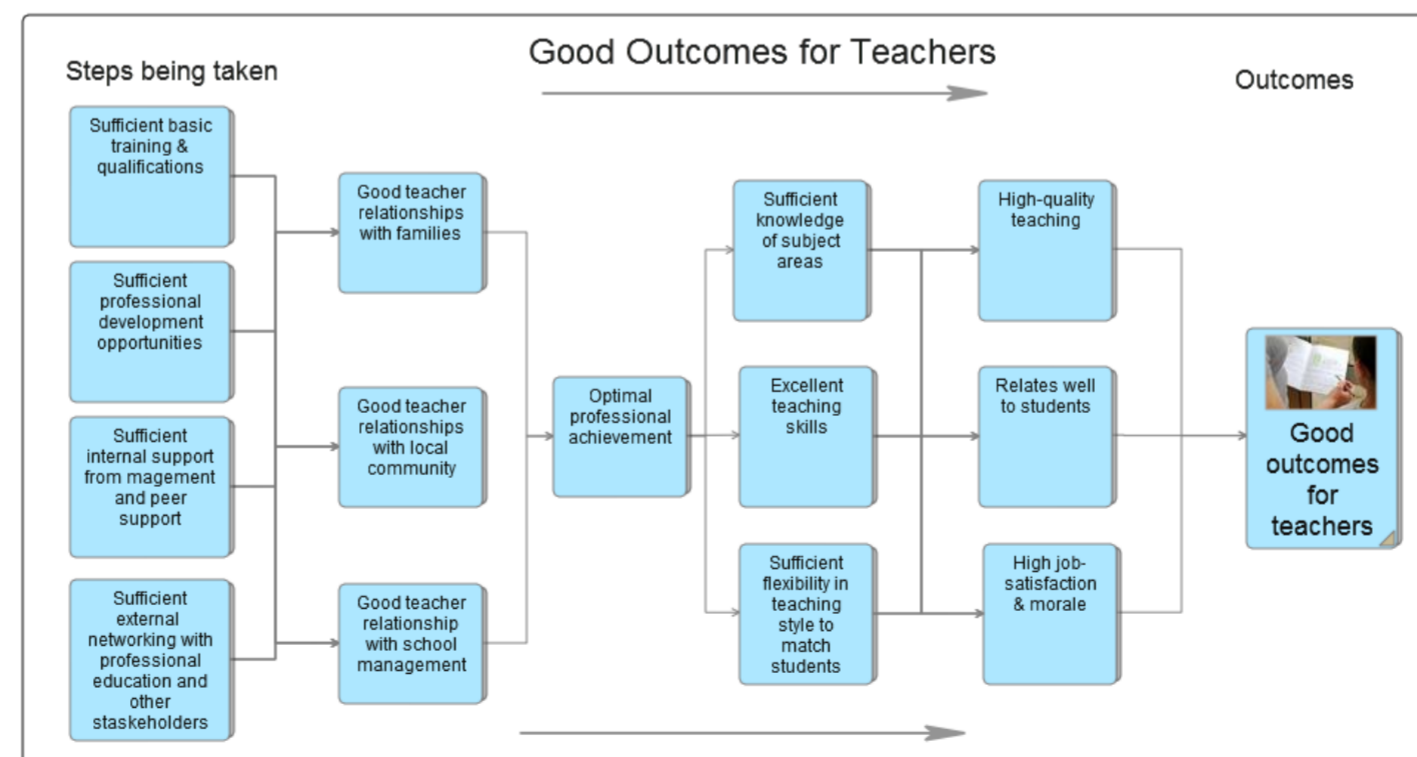

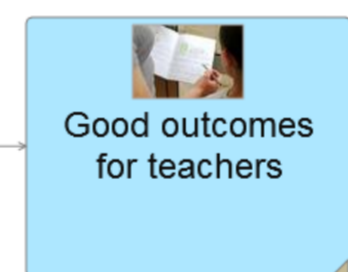

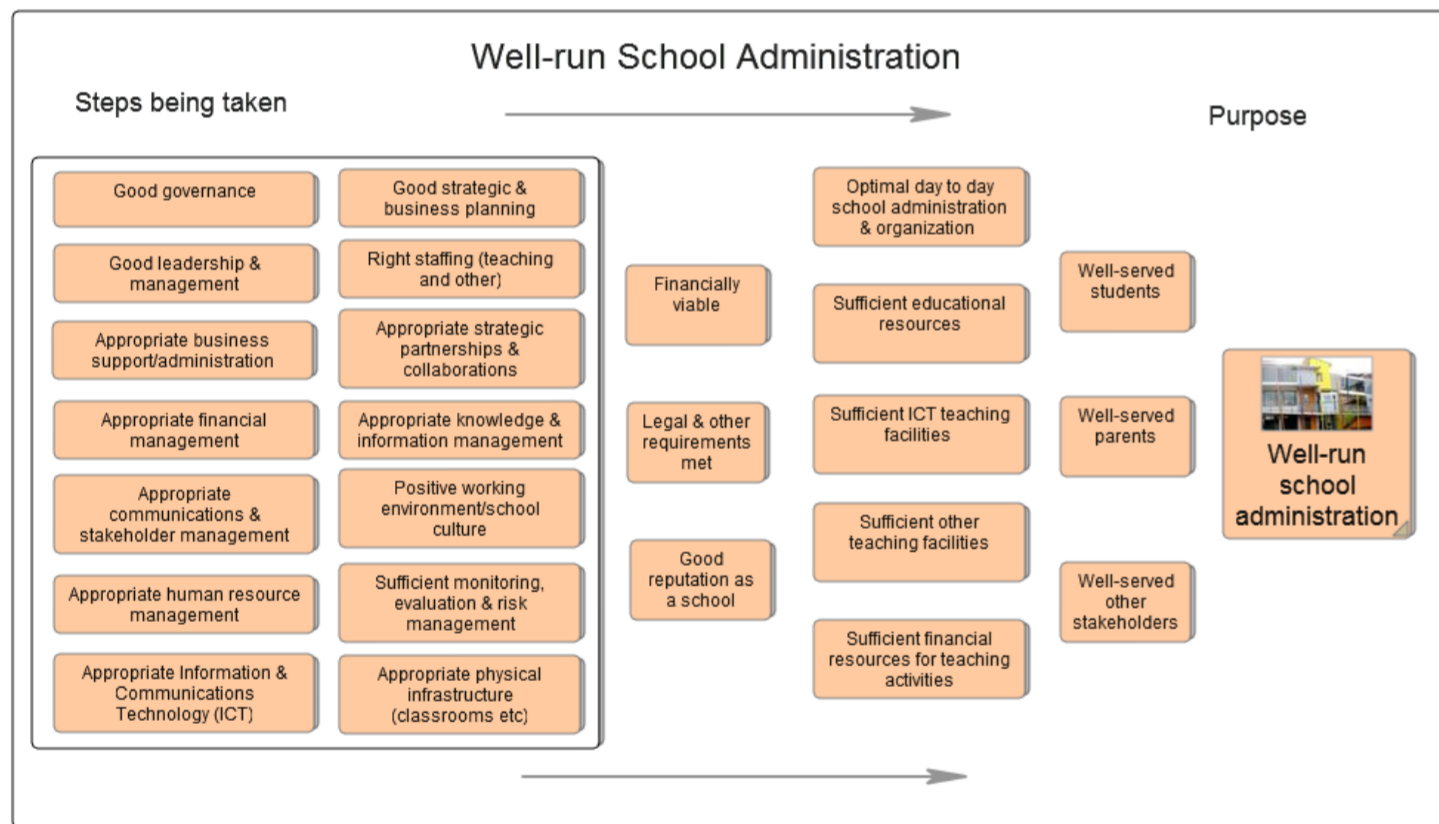

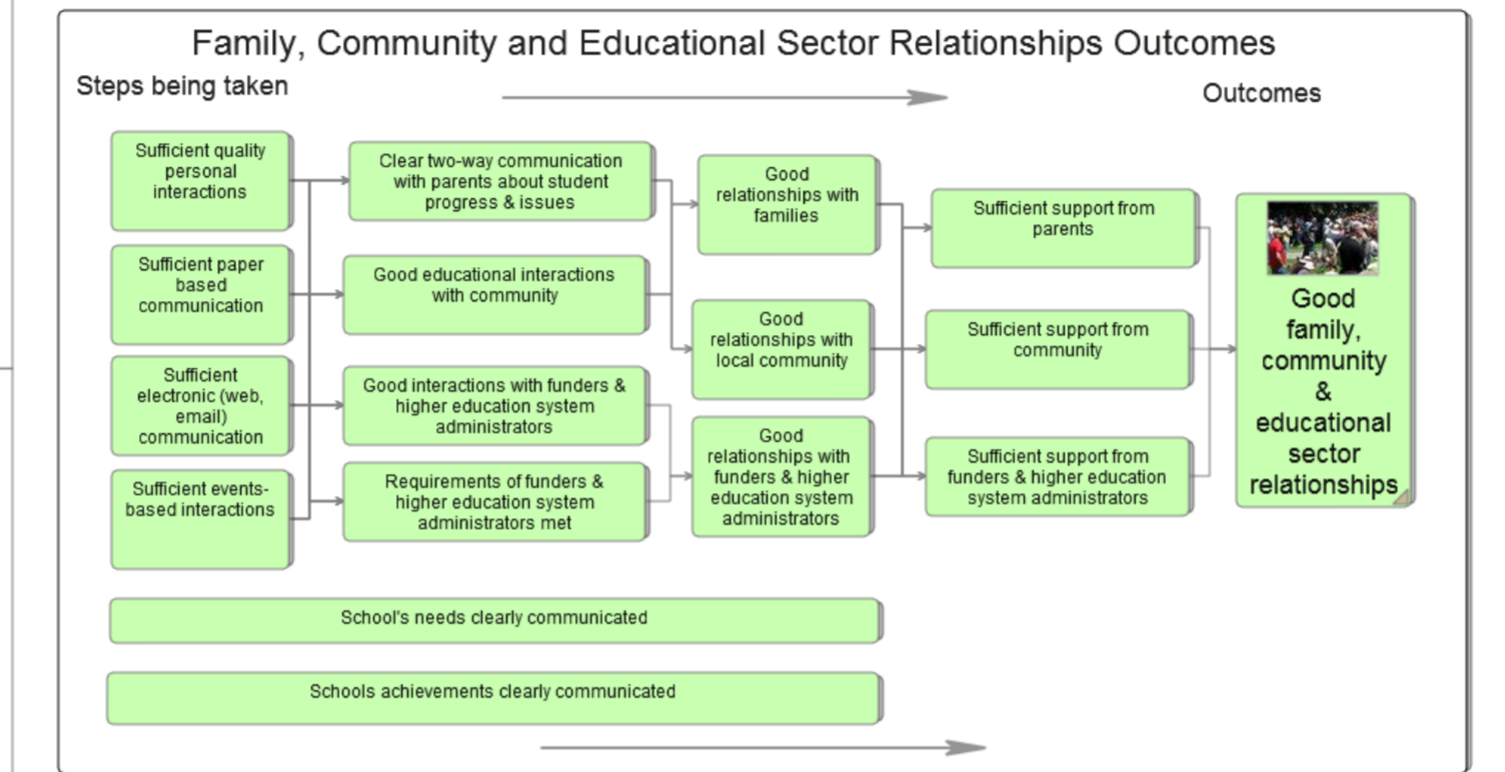

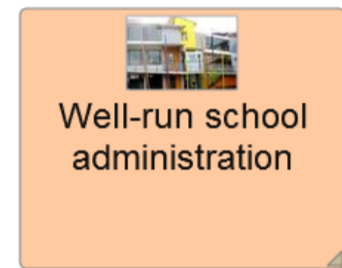

In addition a set of projects have been identified for the next year. They were linked to the outcomes within the model that they are focused on achieving. In the second poster page the links between the projects and the school's outcomes have been drawn.

To find out how to do all of this go to the resources page on the DoView website <http://www.doview.com/resources.html> (includes videos, one page tip sheets to hand out to stakeholders when building models, articles and workbooks).

## Tips for Using this DoView File

---

DoView is outcomes software which both lets you make an outcomes model on your PC, and also lets you quickly create a web page version of your model which you can then put up on the internet.

When you are looking at a web page version of a DoView file you can often (if the person who created it included this option) immediately download the DoView file that created the web page model. You can also often download a PDF version of the file.

To download the DoView file, you just need to click on 'Download the DoView File of this Model' icon which you should be able to see at the bottom of your browser screen.

This file was created in DoView 2.0, so you will need to have DoView 2.0 or later installed to be able to use it.

This web page version of the file can be see at any time at [OutcomesModels.org/models/school6.doview](http://OutcomesModels.org/models/school6.doview).

You can download a trial version of DoView from [DoView.com/download.html](http://DoView.com/download.html).

- [Hyperlink out to download a trial version of DoView](#)
- [Hyperlink out to many resources for working with outcomes models \(including videos, tip sheets, workbooks\) at the OutcomesCentral.Org web site](#)

## Acknowledgments

---

You are free to use this model if you are building your own models within DoView. Please include the following acknowledgment on any version of this model that you use.

Acknowledgment: The building of this model has drawn on the DoView Outcomes Models School Outcomes Model V2-0 (<http://www.outcomesmodels.org/models/school6.html>) developed by Dr Paul Duignan.
